

# PERMA PLAY SURFACING

## DISCOVER

Our Perma Play 2-layer safety surface system is a poured-in-place option and constructed of the finest raw materials available for outdoor and indoor play areas. Comprised of a SBR (styrene-butadiene rubber) base and an EPDM (ethylene propylene diene monomer) wear coat, both are blended with the highest grade binders available in the industry. Our soft playground surface product is truly superior and built to last. Attractive and long-lasting, Perma Play is clean, durable, and installed by our highly trained, certified installation crews.

### PERMA PLAY 2-Layer System

Flush Rolled Edge on Stone Base
