

# SEMI-ANNUAL AND AS-NEEDED MAINTENANCE

## Visual Inspections

Inspect seams and edges, especially in high-traffic areas, to ensure they remain in good condition.

If issues are detected, contact your Pro-Techs representative for repairs.

## As-Needed Repairs and Upkeep

Repair any damage promptly to prevent further deterioration.

Apply a 10:1 water and fabric softener mix using a sprayer to prevent static buildup.

## Snow Removal Tips

Use a power broom for snow removal.

Avoid hand shovels with metal blades, as they can damage the turf.
